1. **Login/Registration:**
   - **Login Page:**
     - Email/Username input field
     - Password input field
     - "Forgot Password?" link
     - "Log In" button
     - "Create Account" link
   - **Registration Page:**
     - Full Name input field
     - Email input field
     - Password input field
     - Confirm Password input field
     - Phone Number input field
     - Address input field
     - Captcha for security
     - "Register" button
     - "Already have an account?" link to go back to the Login Page
2. **Dashboard:**
   - **Main Dashboard:**
     - Welcome message with user's name
     - Quick Action buttons (Send Document, Generate QR, Print Document)
     - Document Statistics (Total Sent, Total Received, etc.)
     - Recent Documents section with thumbnails, document names, sender/receiver names, and timestamps
3. **Send Document:**
   - **Send Document Page:**
     - "Scan QR Code" button
     - Recipient selection with options to search and filter
     - Document upload button with options for camera capture or gallery selection
     - Additional document details (title, description, tags)
     - Auto-Delete Timer setting with a calendar picker
     - "Send" button
4. **Document History:**
   - **Document History Page:**
     - List of sent and received documents with pagination
     - Each item shows document thumbnail, document name, sender/receiver names, timestamps, and status (Sent, Received)
     - Clicking on an item shows detailed document information, including content preview and download option
5. **Print Document:**
   - **Print Document Page:**
     - "Connect to Printer" button
     - List of available printers with details (name, type, status)
     - Select Document dropdown with filter options
     - Print settings (number of copies, paper size, color)
     - "Print" button
6. **Generate QR Code:**
   - **Generate QR Code Page:**
     - Document selection dropdown with filter options
     - Permissions settings (view only, edit, print, download)
     - Additional settings (expiry date, access password)
     - "Generate QR Code" button

- Display generated QR Code with options to copy or save
7. **Privacy Settings:**
  - **Privacy Settings Page:**
    - Auto-Delete Timer settings with predefined options and custom input
    - Blocked Users list with details (username, email) and options to unblock
    - Report User button with a form for detailed reporting
    - Payment Settings for future integration (card details, billing address)
8. **Profile:**
  - **Profile Page:**
    - User details (name, email, phone, address)
    - Profile picture upload option
    - Change Password option
    - Two-Factor Authentication settings
    - Log Out button

Database Design Guidance:

Entities:

1. **User:**
   - UserID (Primary Key)
   - Username
   - Password (Hashed)
   - Email
   - Phone
   - Address
   - Profile Picture
   - Two-Factor Authentication (boolean)
2. **Document:**
   - DocumentID (Primary Key)
   - SenderID (Foreign Key referencing User)
   - ReceiverID (Foreign Key referencing User)
   - Title
   - Description
   - Tags
   - Content
   - Timestamp
   - Auto-Delete Timer
   - Status (Sent, Received)
3. **Printer:**
   - PrinterID (Primary Key)
   - UserID (Foreign Key referencing User)
   - Name
   - Type
   - Status
4. **QRCode:**
   - QRCodeID (Primary Key)
   - UserID (Foreign Key referencing User)
   - DocumentID (Foreign Key referencing Document)
   - Permissions
   - Expiry Date
   - Access Password
5. **BlockedUsers:**
   - BlockedUserID (Primary Key)
   - UserID (Foreign Key referencing User)

- BlockedUserDetails (Username, Email)

6. **Report:**
   - ReportID (Primary Key)
   - ReporterUserID (Foreign Key referencing User)
   - ReportedUserID (Foreign Key referencing User)
   - Report Details

7. **Payment:**
   - PaymentID (Primary Key)
   - UserID (Foreign Key referencing User)
   - Card Details
   - Billing Address
